

Organization: Leadership

Sponsor: Krystal Joplin

Purpose: Leadership is a class unlike any other! Students must be willing to “think outside the box” and approach the class with an incredible attitude! This course offers students a way to learn leadership skills that last a lifetime while giving them an opportunity to make a difference in their school and community by utilizing service-learning techniques. It offers students the opportunity to work with their peers and adults in a setting that provides real-life experiences and gives them the support and structure necessary to deal effectively with those experiences. Experiences will include, but are in no way limited to human relations, organization, time management, problem-solving, communication, project planning and community service. This organization is currently a part of the federally funded National Learn and Serve America grant.
